Greg-

Thanks for this update. Any chance of getting this analytical method and some of the validation data for review prior to Monday's call?

Subject: Re: PPH Discussion Group

All,

REIC Laboratory reports they can detect PPh/DiPPH at less than 10ppb with 20 ml of sample. We are providing them with historic samples from 10-13 Jan so they can look back at those samples for PPh/DiPPH. They are reporting on the current samples at 1.04 ppb level. (Correct me if I am wrong) [REDACTED]

[REDACTED] Ex. 6 - Personal Privacy [REDACTED] is planning on sending out conference call regarding PPh for 10:00 a.m., Monday 27 Jan. We appreciate everyone's assistance with this incident.

Thanks,
Greg

Subject: PPH Discussion Group

This is the entire PPH discussion group as I understand it right now. REIC labs is working overnight attempting to lower the 1.2 ppm detection limit achieved by MATRIC.

Once we here from REIC in the morning we will set up another conference call for the group.
